The National ME/FM Action Network publishes a quarterly newsletter, which is included in our membership fee.

"Quest" keeps our members up-to-date on medical, legal and advocacy issues. It contains informative articles on network activities, news and events nationally and internationally, and stories and updates submitted from support group and individuals. It helps keep our community informed and connected.

Quest is free with membership in the National ME/FM Action Network. It is available in print form or electronically.
